📍 Ambalangoda, Sri Lanka

ABOUT ME

Software Engineering undergraduate with 1 year of hands on internship experience in full stack web development, including building scalable web applications, RESTful APIs, and database driven systems. Strong understanding of software engineering principles, clean code practices, and agile development environments. Proven ability to contribute to end to end feature development, troubleshoot issues efficiently, and collaborate effectively with cross functional teams. Built a solid foundational understanding of Generative AI concepts and modern AI driven application design.

WORK EXPERIENCE

Sri Lanka Telecom PLC

August 2025 - August 2026

Full Stack Software Engineering Intern

MySLT Client Web Portal

- Developed and enhanced frontend features using React and TypeScript for a production web portal.
- Resolved UI and functional bugs, improved responsiveness, and maintained consistent user experience using Material UI and Zustand.

E-Channeling System (Hospital Management System prototype)

- Contributed to a microservices based web and mobile platform across frontend, backend, and database layers.
- Implemented core features including authentication, booking, search, and user profile management using Next.js, TypeScript, Prisma, and PostgreSQL.
- Built key frontend components such as the landing page, navigation, and footer, while supporting backend service development.

DPRS - Digital Paper Reduction System

- Developed mobile application screens using Flutter for the DPRS platform.
- Led backend development from scratch, including project structure, middleware, configuration, utilities, and server setup.
- Designed backend architecture and database structure, created ERD diagrams, and documented the system.
- Implemented major backend features such as Azure integrated login APIs and memo creation APIs.
- Conducted code reviews, fixed bugs, and supported overall code quality improvement across the team.

PROJECTS

SHUTR - WebApp

Built a platform connecting clients with photographers with AI powered search, portfolio management, real time chat, calendar scheduling, booking and reviews

- Technologies: Next.js, Django, MongoDB, AWS S3

Ask Your Docs - AI Powered Document Q&A System

Built a full stack Retrieval Augmented Generation (RAG) application that enables users to upload documents and ask context aware questions using semantic search and LLMs. Designed a scalable backend pipeline for document ingestion, chunking, embedding, and retrieval, with a modern React based frontend.

- Technologies FastAPI, LangChain, LangGraph, GPT-4 & Embeddings, Pinecone, React, TypeScript, PostgreSQL

Student Management System

Built a full stack student management system with role based access, featuring JWT auth, search, course management, and filtering.

- Technologies: React.js, Redux, Tailwind CSS, Node.js, Express.js, PostgreSQL

Plane Ticket Booking System

Built a console based Ticket booking application to manage seat reservations using OOP and file handling. Implemented seat selection, booking and file based storage.

- Technologies: Java, OOP, File I/O

SKILLS

Programming Languages : Java, Python, JavaScript, TypeScript, PHP

Web Development : HTML, CSS, React.js, Next.js, Redux, Node.js, Express.js, Django, fastAPI

Databases : MongoDB, MySQL, PostgreSQL

Generative AI : RAG, multi agent systems, LLM fine tuning concepts, transformer architecture, LangChain, LangGraph

Concepts & Tools : Object Oriented Programming (OOP), REST API, Postman, GitHub

Professional Skills: Time Management, Leadership, Teamwork, Critical Thinking

EDUCATION

Informatics Institute of Technology, affiliated with the University of Westminster (UK)	2023 - Present
Undergraduate, BEng (Hons) Software Engineering	
Aquinas College	March 2023 - July 2023
Completed Certificate Level 3 of Aquinas English Diploma	
Informatics Institute of Technology	2022 - 2023
Foundation Certificate in Higher Education - Merit Pass	
G/P. De S. Kularathna College	2018 - 2021
GCE Ordinary Level 8A 1B	
GCE Advanced Level Mathematics stream	

CERTIFICATION

- AI Engineer Bootcamp (Generative AI Course by STEM Link)2025 - 2026
Covered Generative AI fundamentals, RAG-based systems, multi agent architectures, LLM fine-tuning concepts, and transformer based model understanding.
- Participating in the Hult Prize On Campus Qualifier Round2025 - March
- Certified in "Java Object Oriented Programming" by Kathryn Hodge LinkedIn Learning2024
