Ambalangoda, Sri Lanka

ABOUT ME

Software Engineer with 1 year of hands on industry experience in full stack web development at Sri Lanka Telecom PLC. Experienced in building and maintaining production web applications, RESTful APIs, database driven systems, and backend services using React, TypeScript, Next.js, Node.js, Express.js, and PostgreSQL. Contributed across frontend, backend, database, authentication, debugging, and code review activities in collaborative engineering teams. Built a solid foundational understanding of Generative AI concepts and AI driven application design, with an interest in applying modern AI technologies to software engineering solutions. Currently completing a BEng (Hons) in Software Engineering and available for full time software engineering roles.

WORK EXPERIENCE

Sri Lanka Telecom PLC | August 2025 - August 2026

Full Stack Software Engineering Intern

MySLT Client Web Portal

- Developed and enhanced production web portal features using React.js and TypeScript.
- Resolved UI and functional issues and improved responsive behavior using Material UI and Zustand.
- Worked within an existing production codebase to implement changes and maintain consistent user experience.

E-Channeling System (Hospital Management System prototype)

- Contributed to a microservices based web and mobile platform across frontend, backend, and database layers.
- Implemented features including authentication, appointment booking, search, and user profile management using Next.js, TypeScript, Prisma, and PostgreSQL.
- Developed reusable frontend components and supported backend service development and integration.

DPRS - Digital Paper Reduction System

- Led backend development from scratch, defining the project structure, middleware, configuration, utilities, and server setup.
- Designed the backend architecture and PostgreSQL database structure, including ERD design and technical documentation.
- Implemented core REST APIs, including Azure integrated authentication and memo management features.
- Conducted code reviews, resolved bugs, and supported development quality across the team.
- Collaborated with team members to break down backend tasks, review implementations, and integrate features across the application.

PROJECTS

SHUTR - AI Powered Photographer Marketplace

Built a full stack photographer marketplace for Sri Lanka covering portfolios, bookings, PayHere payments, realtime chat, reviews and AI search that understands plain language requests.

• Technologies: Next.js, TypeScript, Django, MongoDB, Gemini AI

Ask Your Docs - AI Powered Document Q&A System

Built a full stack Retrieval Augmented Generation (RAG) application that enables users to upload documents and ask context aware questions using semantic search and LLMs. Designed a scalable backend pipeline for document ingestion, chunking, embedding, and retrieval, with a modern React based frontend.

• Technologies FastAPI, LangChain, LangGraph, GPT-4 & Embeddings, Pinecone, React, TypeScript, PostgreSQL

Student Management System

Developed a role based school management platform with user management, class/subject management, teaching assignments, marks, and academic reporting. Implemented role based access controls for secure data and mark management.

• Technologies: React.js, Redux, Tailwind CSS, Express.js, PostgreSQL

SKILLS

Languages : TypeScript, JavaScript, Java, Python, PHP

Frontend & Backend: React.js, Next.js, Redux, HTML, CSS, Tailwind CSS, Node.js, Express.js, FastAPI, Django

Databases : PostgreSQL, MongoDB, MySQL

AI /Generative AI : RAG, LangChain, LangGraph, LLM based Applications, Embeddings, Multi Agent Systems

APIs & Engineering : REST API, OOP, API Integration, Database Design

Tools & Practices : Git, GitHub, Docker, Postman, Agile, Code Review

Professional Skills: Time Management, Leadership, Teamwork, Critical Thinking

EDUCATION

BEng (Hons) Software Engineering

Informatics Institute of Technology, affiliated with the University of Westminster (UK) | 2023 - 2028

Final-year student | Part-time study

Certificate Level 3, Aquinas English Diploma

Aquinas College | March 2023 – July 2023

Foundation Certificate in Higher Education — Merit Pass

Informatics Institute of Technology | 2022 – 2023

GCE Ordinary Level (8A, 1B) & Advanced Level (Mathematics Stream)

G/P. De S. Kularathna College | 2008–2021

CERTIFICATION

- AI Engineer Bootcamp - STEM Link | 2025 - 2026
  Covered Generative AI fundamentals, RAG based systems, multi agent architectures, LLM fine tuning concepts, and transformer based model understanding.
- Participating in the Hult Prize On Campus Qualifier Round | 2025
- Certified in "Java Object Oriented Programming" by Kathryn Hodge LinkedIn Learning | 2024
